Examine Network Address Translation Using Cisco Packet Tracer

AIM:

To configure and examine Network Address Translation (NAT) using Cisco Packet Tracer and verify communication between a private network and public network.

Procedure:

Step 1 - Open Cisco Packet Tracer.

Step 2: Add network devices.

Step 3: connect the devices

Step 4: Connect Devices then open router CLI

Step 5: Configure inside interface

Step 6: configure outside interface

Step 7: configure static NAT

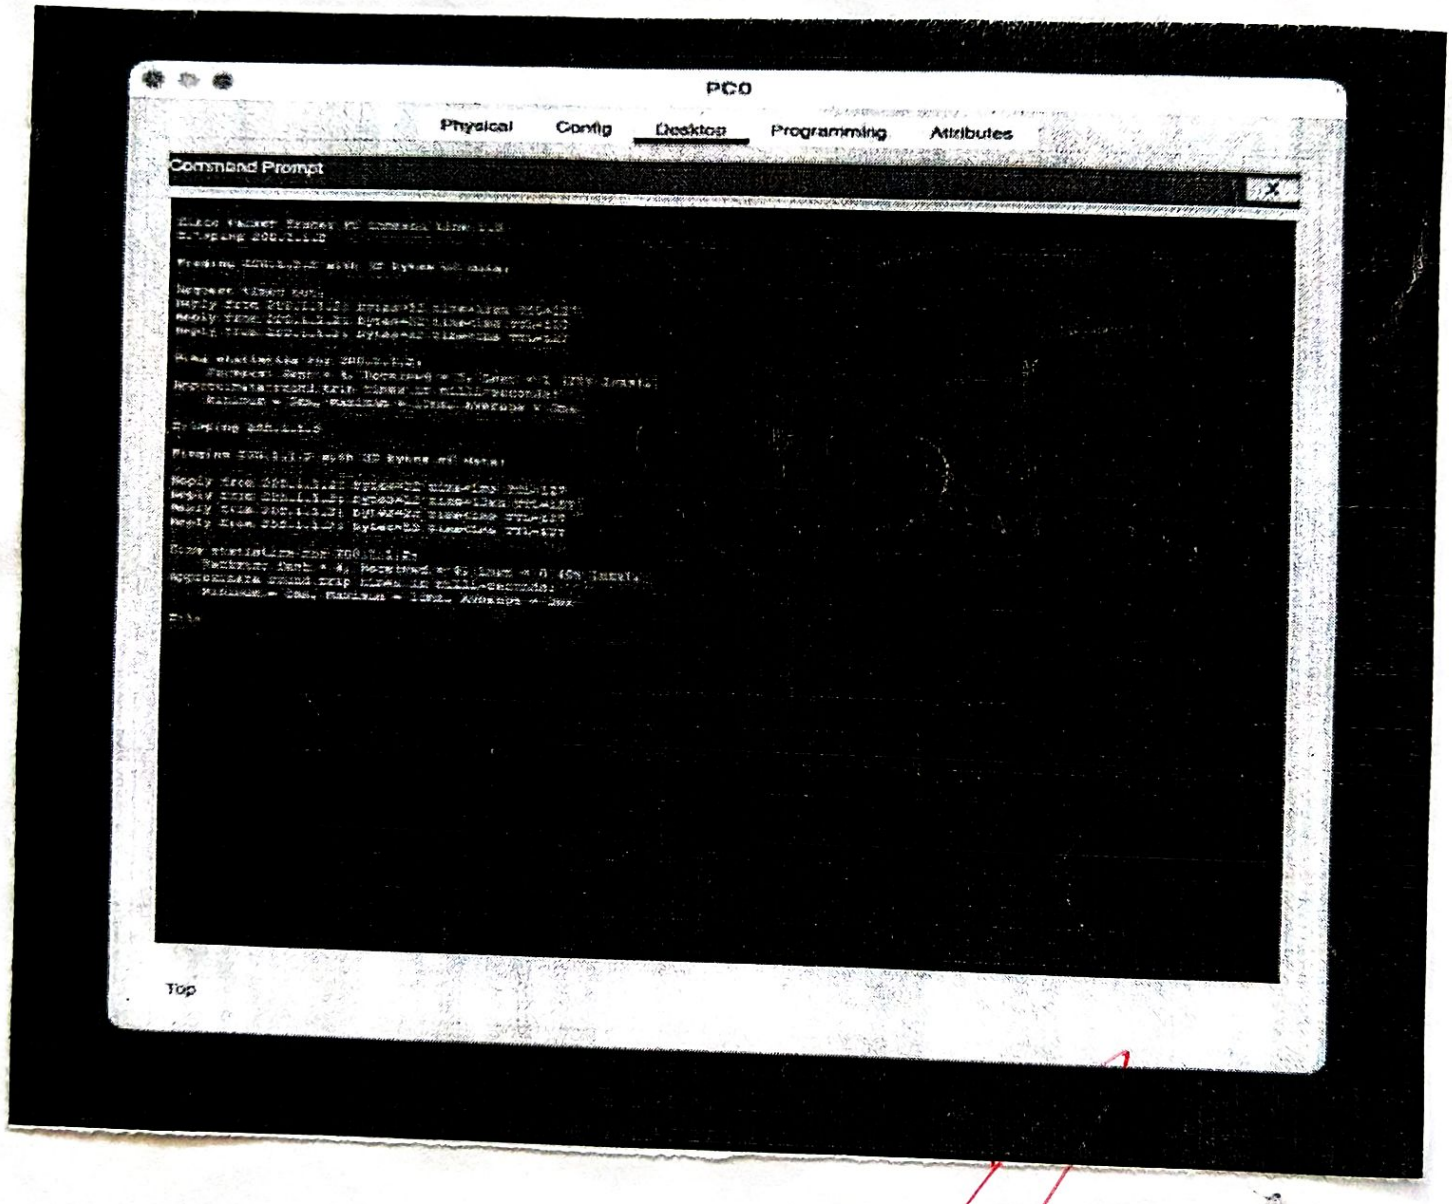

Step 8: Save configuration

Step 9: Assign IP Address

Step 10: Assign then Test Connectivity

Step 11: Verify NAT translation

Step 12: View NAT statistics
