Learning and Assignment of IP addrus manually to computer

AIM:

To understand the IP addressing scheme and manually assign static and manully addresses.

PROCEDURES:

* In Windows : Open network and sharing center -> change adapter settings -> Right click.
* Enter IP address : 192.168.1.10, Subnet mask 255.255.255.0 default gateway: 192.168.1.1
* In Linux: Use command : studio ip route add 192.168.1.10/24 dev etho.
* for parsistent configuration in linux.
* Ping another computer on same subnet to verify communication.

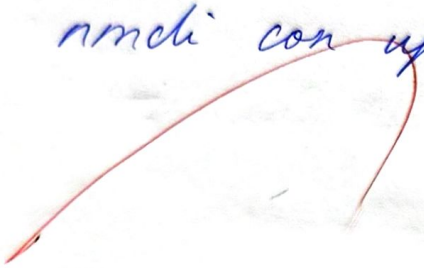

COMMANDS/CODE:

Sudo ip addr 192.168.1.10/24 dev
sudo ip route add default via 192.168.1.
ip a show etho.

Ping 192.168.1.1

address 192.168.1.10/24.

nmcli con mod "wired connection 1"
manual.
nmcli con up' wired connection.

RESULT:
= Static IP address were successfully assigned to computers.
