Exp: 8

Develop Program to create reverse Shell Using TCP sockets.

AIM:

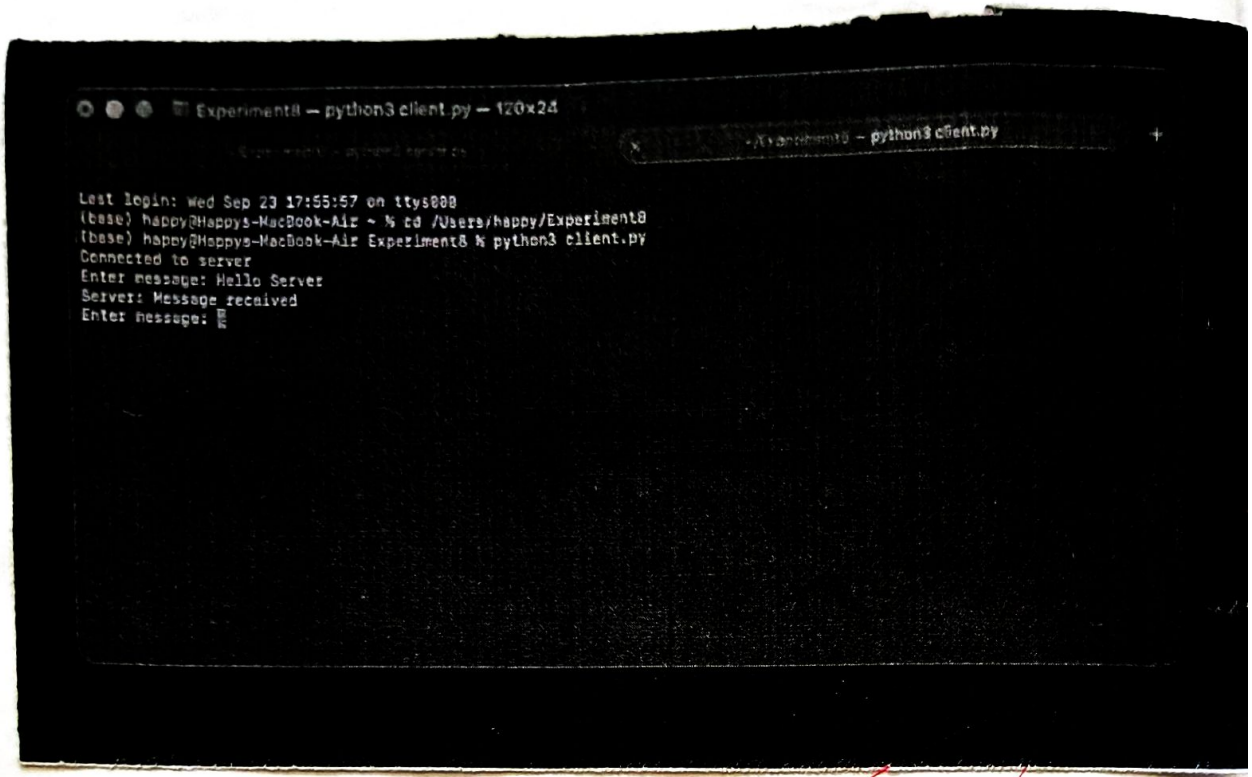

To develop TCP socket based client server program that demonstrate reverse-shell communication by connection b/w client & server.

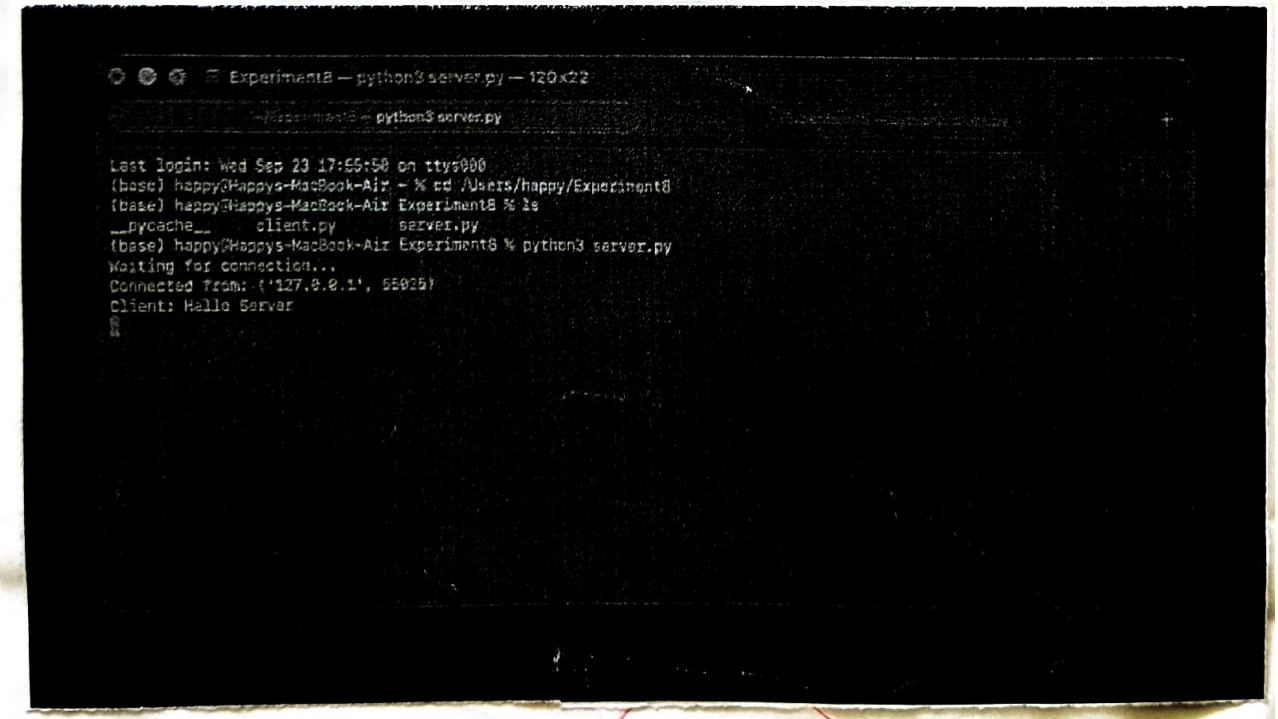

PROCEDURE:

* Create Server named server.py
* Create client name client.py
* Run Server.
* Run client
* Test multiple messages.

RESULT:

Thus Program develop TCP socket that demonstrate reverse shell successfully.

Experiment8 — python3 client.py — 120×24
python3 client.py
